Our Vision

"To keep our customers safe and secure by delivering reliable high-quality and value driven fencing solutions combined with project management excellence"

GARRISON SECURITY FENCING

Garrison Security Fencing is ideal for the protection of industrial properties by deterring intruders to prevent property damage and theft.

Designed and manufactured for maximum strength with face-welded steel panels and Anti-Vandal fixings to stop vandals removing fence panels.

Garrison Security Fencing is available in a colour of your choice.

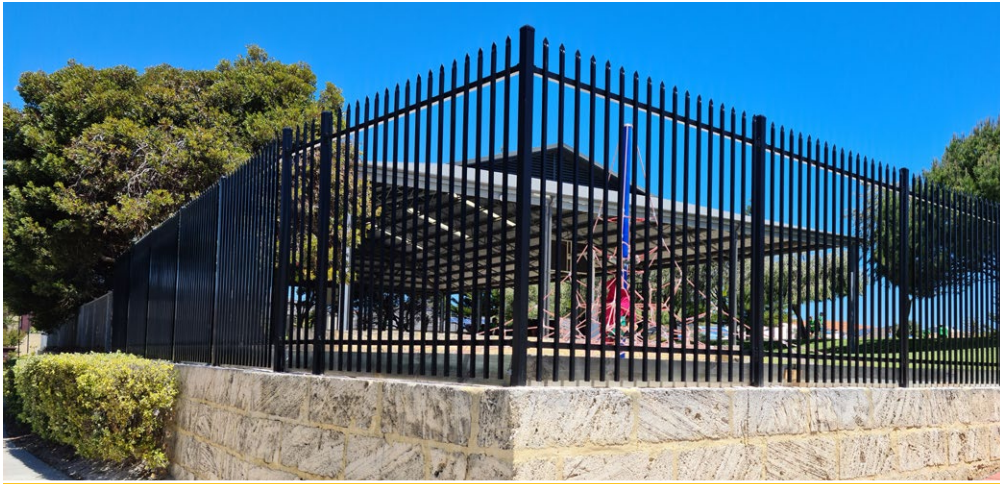

GARRISON SECURITY FENCING

Our premium Anti-Corrosion Primer Coating is applied prior to powder coating, ensuring product longevity.

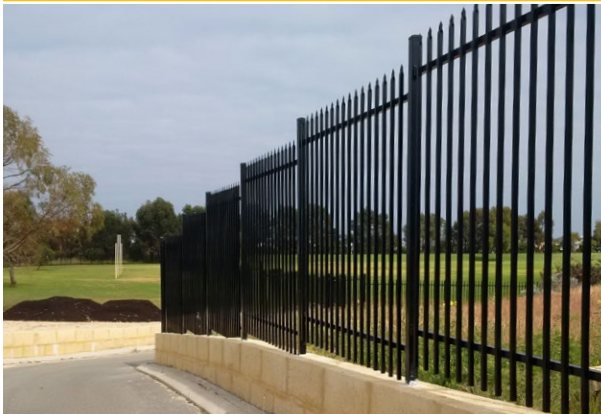

Matching sliding and swinging gates are manufactured to suit your access requirements with optional automated operation.

Steel construction that intruders can't cut through with pliers.

SECURITY SCREEN FENCING

Security Screen Fencing delivers both a heavy-duty security barrier around industrial properties along with total screening.

By providing a dual-layer of protection security screen fencing prevents criminals from mechanically cutting through the fencing or removing fence panels

Ideal for securing and screening off mechanical workshops or exterior storage areas within industrial properties.

Protects against intruders from having visual access to your property.

Security Screen Gates are manufactured to suit your requirements for areas requiring pedestrian or vehicle access.

CHAINWIRE FENCING

Chainwire Fencing is a versatile medium-duty fencing system to prevent property invasion and create internal warehouse compounds.

Available in Galvanised and Black PVC coated Chainwire.

Optional top and bottom rails prevent the Chainwire being crushed across the top or pulled up along the base.

Customised Gates are manufactured to suit your access requirements.

TUBULAR STEEL FENCING

Tubular Steel Fencing is ideal for around car park areas and to protect pedestrian walkways from vehicle access.

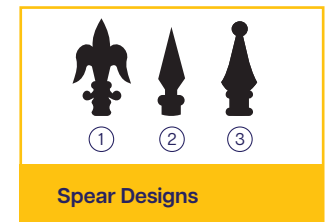

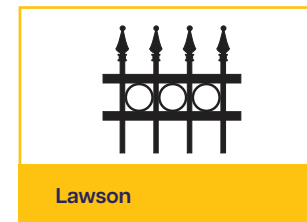

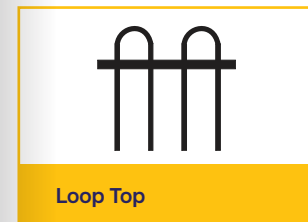

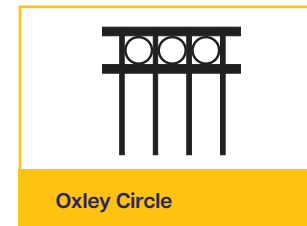

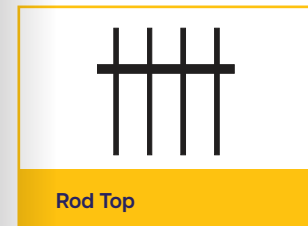

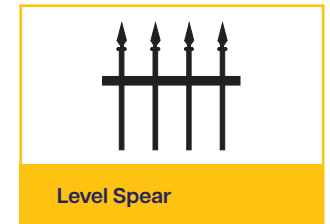

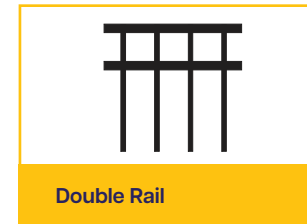

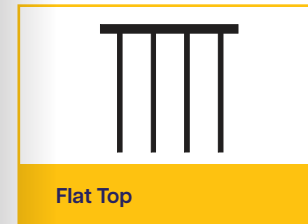

Designed and manufactured from fully galvanised steel and protected with K-Line's premium Anti-Corrosion Primer coating to withstand the test of time.

Flat-Top tubular steel panels are designed without pointed uprights to create a safe low-height barrier beside walkways.

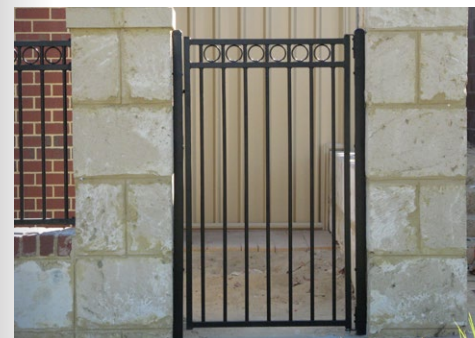

Available in a colour of your choice.

TUBULAR FENCING DESIGNS

TUBULAR GATES

COLORBOND FENCING

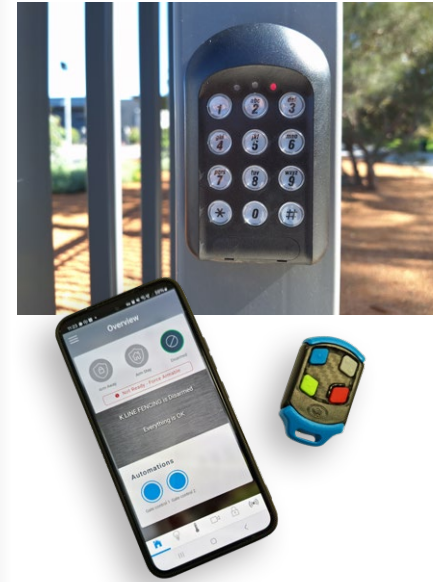

Colorbond Fencing is a great solution to screen off areas on industrial properties.

A wide range of colours are available to blend your fencing colour in with the surroundings on your property.

Colorbond Fencing is ideal for screening off workshop areas to maintain excellent property presentation and to screen off outdoor storage areas preventing valuable stock from being visible on industrial properties.

Optional barbed wire can be installed for additional security.

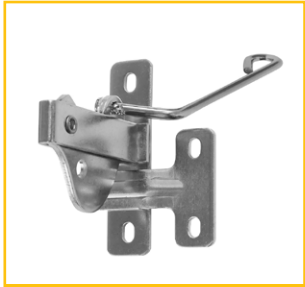

GATE AUTOMATION

Gate automation systems are designed to meet your specific requirements and can be incorporated with the following accessories:

- Safety Beams
- Battery Back-up
- Exit Loop
- Remote Controls
- Pin Pad Access
- Mobile App

GATE ACCESSORIES

PROJECT MANAGEMENT & INSTALLATION

PROJECT MANAGEMENT EXCELLENCE

Our team of highly qualified and experienced project managers ensure you experience a streamlined and hassle-free installation process.

DEDICATED PROJECT MANAGER

Each commercial fencing project is assigned a dedicated project manager to keep you informed and save your valuable time with a single point of contact.

YOUR SAFETY

The safety of your personnel is our priority, our team ensures all works are carried out safely to protect your staff from being exposed to hazards.

EXPERIENCED AND QUALIFIED INSTALLERS

All commercial fencing projects are installed by highly experienced and qualified installers, ensuring our high standards of workmanship are maintained.

PROJECT COMPLETION – QUALITY INSPECTION

On completion, fencing installations are inspected to confirm our high standards of workmanship are maintained with no damage to your property.

TESTIMONIALS

*The fence looks amazing and the whole project was so fast!
We are very happy with it.*

Tracey | College of Electrical Training

I wanted to reach out and thank you all for your assistance in our recent new fence installation. The project was extremely well managed, and I appreciate what everyone did to make it a seamless and stress free experience. The fence looks magic, and we are extremely happy with the results. Thank you again.

Shane | Geographe

The fence installation looks fantastic and we have not had a break in since our new fence was installed.
